

## Hydro-Sizer FRAC-Sand Application

Field Tested. Application Driven.

A Kinetrol USA Midwest Distributor installed a Kinetrol actuator on a hydro-sizer used at a FRAC-sand plant. Previously the customer used Bettis electric actuators which cycled every 2-10 seconds. The electric actuator would burn up after 2 weeks. The Distributor sold them a Kinetrol pneumatic actuator which has worked continuously for 2 years with no maintenance. The customer has since purchased 10 more units.

**Installed:** 2 Years

**Cycles:** 14,400 per day  
No Maintenance To Date
